Days three (3) and greater	\$140.00 per container/day for the account of the steamship line

Item 196 - EXPORT CONTAINER WEIGHTS FOR VERIFIED GROSS MASS (VGM):

Pursuant to the April 28, 2016, Declaration of Equivalency to Regulation VI/2 of the International Convention for Safety of Life at Sea (SOLAS) issued by the U.S. Coast Guard which allows existing U.S. laws and regulations for providing verified container weights are equivalent to the requirements of SOLAS Regulation VI/2, NCSPA will provide container weights on behalf of the shipper, unless the shipper requests an alternative method. The specific method allowed by the U.S. Coast Guard for providing the container’s verified gross mass (VGM) whereby a terminal weighs the container and, when duly authorized, verifies the VGM on behalf of the shipper is hereby offered by NCSPA. The NCSPA is in full compliance with 29 CFR 1918.85(b) container weight requirements in that it weighs all export containers moving through the port with scales calibrated and certified by the North Carolina Department of Agriculture. To facilitate the safe and efficient movement of export container cargo via the Port of Wilmington, the North Carolina State Ports Authority will utilize the following procedures at the port for weighing of all export containers:

- The gross container weight (cargo and container tare weight) shall be determined in the following way:

- The truck (including fuel and driver), chassis, container, cargo, and any other ancillary equipment such as genset (where utilized) are weighed intact on the certified scales thereby providing a gross scale weight.
- The weight of the truck (as declared on the Department of Motor Vehicle’s registration), chassis, fuel, driver weight and other ancillary equipment (as declared by the trucking company) are deducted from the gross scale weight to arrive at the gross container weight (cargo and container tare weight).

This gross container weight will be supplied to the ocean carrier as the shipper’s VGM for the container via EDI 301 or VERMAS transmission contemporaneously with its determination.

These VGMs will be made available to stevedores or others stowing ships in the port for utilization in stowage plans. All shippers shipping export containers via the port authorize the use of these procedures to meet their SOLAS obligations. If a shipper using the port wishes to use an alternate method to comply with its SOLAS obligation, it shall make the necessary arrangements with the ocean carrier moving its cargo. Notwithstanding any such arrangements, however, shippers’ containers will be weighed and the weight will be supplied to the ocean carrier as provided in this procedure in order to facilitate compliance with applicable SOLAS requirements and associated guidelines.

All Regulations under this Marine Terminal Operating Schedule #1 (MTO), including, but not limited to, MTO Items 10 (Authority Held Harmless) and 15 (Authority Liability), shall apply.

Item 198 – DAMAGED, FOR SALE & OFF HIRE CONTAINER HANDLING PROCEDURES (Effective August 1, 2016):

Empty containers found in a damaged condition by Authority personnel during the course of normal operations will be reported to the Authority and the ocean carrier. Such containers will be made available for inspection prior to being placed in the designated damaged empty stack. Authority personnel will update the Terminal Operating System to reflect these containers as being damaged.

Ocean Carriers will be able to review the status of their damaged containers by using the Terminal Operating Systems.

Once a container has designated as damaged, Ocean Carriers will have fourteen (14) calendar days to have the container repaired, positioned for vessel loading, or removed from the terminal. The dwell time clock for containers will begin at midnight on the day the container is designated as a damaged container.

If the container is not repaired, repositioned or removed from the terminal within the allotted fourteen (14) calendar days, the Authority will arrange to have the damaged container relocated to a designated area where storage and any handling charges will be assessed against each container. Drayage charges and an Administrative Processing Fee will be assessed against each container that is drayed. Storage of \$15.00/container/day and handling charges at the terminal for containers affected by this procedure will be based upon the rates in this MTO schedule. Charges will be based upon the container’s arrival date at the terminal, and must be paid prior to the container(s) being released by the Authority. A minimum of forty-eight (48) hours’ notice to make a damaged container available for repairs or pick-up is required.

This item also includes “for sale” and “off hire” containers. Carriers will have 14 calendar days to remove such containers before applicable charges will be applied.

The charges in this rule will be assessed in full regardless of provisions in any other agreement between the ocean carrier and the Authority.
